From: New Hampshire Oral Health Coalition

Re: SB193-2013

Consistent with our mission, the New Hampshire Oral Health Coalition supports the intent of SB 193-2013 to increase access to oral health services for New Hampshire residents.

The NHOHC is comprised of a diverse set of stakeholders in oral health. Although not all of our members agree with the specific proposal identified in SB 193, as per our Oral Health Plan strategies, the majority of our members support the efforts of the NH Legislature to explore models of workforce alternatives.

We understand that within our membership, there are differing opinions on specific workforce models; and we know that our members will be testifying to those opinions. We respect these differences of opinion and agree that workforce is only one consideration for increased access.

We find this bill consistent with our Coalition mission, principles and objectives. Specifically, we support this bill as it relates to the following

- Exploration of the development of workforce alternatives that create new oral health service access to NH residents currently underserved due to limited workforce in relation to geography, demographics, insurance/benefit coverage, etc.
- The development of best-practices through the examination of new options.

We encourage the legislature to continue the oral health workforce alternative discussion with a goal to increase access to oral health services within the state. The Coalition remains at the table to hear the support and concerns of others. We will examine comments and potential amendments as they are presented.

Thank you.

Gail T. Brown, Esq., MSW
